SOMERS BROTHERS CAPITAL MANAGED FUTURES PROGRAM REACHES  
FIVE-YEAR MILESTONE IN THE TOP TEN PERCENT OF ITS CATEGORY

(This investment program is open only to Qualified Eligible Participants / “QEPs”)

Wayne, PA ---- Somers Brothers Capital, LLC, a registered commodity trading advisor, announces performance results for its “*Diversified Futures Program #1*”: in its first five years, ending December 31, 2009, the program delivered a compound average growth rate of 21.76%.

Commodity trading involves substantial risk of loss and past results are not necessarily indicative of future results

This 21.76% growth rate places the program in the top ten percent (92nd percentile) among commodity trading advisor programs with a minimum of five years of market history, according to rankings by industry data services Barclay Hedge and Stark & Company. Barclay Hedge and Stark rankings are provided to those commodity-trading advisors who voluntarily submit their results and neither Barclay Hedge nor Stark & Company verify the accuracy or completeness of the data provided.

“We are very pleased overall with our results. Since we started trading this program we have encountered two so called ‘once in a life time’ market events: first, in the summer of 2007, we saw a price dislocation in world markets never before encountered, spurred by an unprecedented credit tightening, and then in the latter part of 2008 and into the first quarter of 2009, we saw a decline of nearly 53% in the S&P 500. During this time our program has not only proved its resilience, but has provided outsized returns. The fact that our program performed well as the stock market was falling confirms the idea that a well-structured investment portfolio should have an allocation to managed futures,” said the company’s founder, Steve Somers.

Somers Brothers' "*Diversified Futures Program #1*" is a managed futures program investing in commodity, currency and stock index futures. The program's yearly results: 2005: +37.31%; 2006: +39.44%; 2007: - 11.86%; 2008: +80.78%; 2009: -12.28%.

The total 5 year return for the program: 167.61% All performance numbers are net of fees. This compares to a total return of 2.07% for the S&P 500 (dividends included).

Commodity trading involves substantial risk of loss and past results are not necessarily indicative of future results. It should be noted that the fund experiences draw-downs, the worst peak to valley draw-down being 33.56% between November 2006 and August 2007 . The worst monthly drawdown was 27.7%, experienced in August, 2007.

Established in 2005, Somers Brothers Capital, LLC is registered as both a commodity pool operator and a commodity trading advisor with the Commodity Futures Trading Commission and is a member of the National Futures Association. The *Diversified Futures Program #1* is open to investment only to qualified eligible participants (QEP), in the form of a pooled investment (\$100,000 minimum) or as a separately managed account (\$800,000 minimum). Somers Brothers also offers its services as a commodity trading advisor to corporations, money management firms, registered independent advisors and investment funds. The company is located at 1170 Devon Park Drive, Suite 106, Wayne, Pennsylvania 19087
